---

**PROFESSIONAL SUMMARY**

Certified Java Full Stack & DevOps Engineer with comprehensive training from JSpiders (Hebbal) and hands-on expertise in AWS, CI/CD pipelines, and Containerization (Docker/Kubernetes). Currently working as a DevOps Trainee at Myventis Technologies Pvt. Ltd., gaining industry exposure to DevOps practices, deployment workflows, and cloud technologies.

**EXPERIENCE**

**DevOps Trainee | Myventis Technologies Pvt. Ltd. | Bengaluru, India | Jul 2026 – Present**

- Working in a DevOps trainee role with practical exposure to CI/CD, cloud infrastructure, containerization, Linux, and deployment workflows.
- Applying Git, GitHub, Jenkins, Docker, Kubernetes, AWS, Terraform, and Linux skills in hands-on development and deployment activities.
- Supporting automated build, deployment, and environment-management practices while learning industry-standard DevOps workflows.

**TECHNICAL SKILLS**

- **Cloud Platforms:** Amazon Web Services (AWS) - EC2, S3, IAM, VPC, Security Groups, Auto Scaling
- **CI/CD & Automation:** Jenkins (Pipeline-as-Code, Jenkinsfile), GitHub Webhooks, Build Automation
- **Containerization & Orchestration:** Docker, Docker Compose, Kubernetes (K8s) (Pods, Deployments, Services, Ingress)
- **Infrastructure as Code & Config:** Terraform (Provisioning, State Management), Ansible, YAML
- **Version Control & Monitoring:** Git, GitHub (GitOps workflow), Prometheus (Basic), Grafana, Log Management
- **Operating Systems & Scripting:** Linux Administration (Ubuntu), Shell/Bash Scripting, Cron Jobs
- **Programming & Frameworks:** Core Java, Advanced Java, Spring Boot, Oracle SQL, HTML, CSS, JavaScript

**CERTIFICATIONS & TRAINING**

**Java Full Stack Development with DevOps (Certified)** | JSpiders-Hebbal, Bengaluru, India | Completed 2025

- Intensive industry-oriented training covering Core Java, Advanced Java, Spring Boot, Web Technologies (HTML/CSS/JS), SQL, and complete DevOps toolchain (Jenkins, Docker, Kubernetes, AWS).
- Completed capstone projects involving real-time deployment scenarios and obtained course completion certificate.

**KEY PROJECTS**

**Spring Boot & Java Application Deployment using CI/CD, Docker & Kubernetes**

Architected and automated an end-to-end CI/CD delivery pipeline utilizing GitHub, Jenkins, Docker, and Kubernetes (K8s) on Ubuntu servers.

• Containerized Spring Boot and Java-based web applications with Docker, successfully managing multi-service setups using Docker Compose.

• Configured a Kubernetes cluster with Deployments, Services, and Ingress resources, achieving high availability and efficient external traffic routing.

• Automated infrastructure provisioning and configuration steps, decreasing application deployment cycle times.

**Automated Web Application Deployment on AWS**

• Engineered a continuous integration pipeline using Jenkins to automate deployments directly from GitHub to live Nginx web servers.

• Integrated GitHub Webhooks to trigger automated unit builds and automated transfer of artifact files to the web directory (/var/www/html).

• Designed secure AWS infrastructure using EC2, S3 (static asset storage), IAM roles, and SSH key-based authentication with tight Security Groups.

• Implemented SMTP email notification plugins in Jenkins to alert developers instantly of build status, cutting failure resolution times.

**Campus Recruitment Management System**

• Developed a secure, multi-role campus recruitment platform using PHP, HTML/CSS, and MySQL for students, administrators, and hiring companies.

• Designed a responsive, user-friendly UI/UX and integrated secure form authentication modules.

• Managed back-end databases using phpMyAdmin and executed hosting environments using local XAMPP/WAMP stacks.

**EDUCATION**

**Bachelor of Computer Applications (BCA)** | Williams International College, Bengaluru, India | CGPA: 7.88/10

**Higher Secondary (12th Std/2nd PU)** | Mount Park Hr. Sec. School, Tamil Nadu, India | CGPA: 7.01/10 (70.01%)
